

DDS Function Generator

ESFG5200 Series

Introduction

The ESFG5200 series are arbitrary waveform/function generators with maximum frequency of 25MHz, 40MHz and 60MHz, based on Direct Digital Synthesis (DDS) technology, providing high fidelity, low jitter performance function signal and arbitrary waveform signal.

The ESFG5200 series are equipped with 150MSa/s sampling rate, 14 bits vertical resolution, ± 1 ppm high stability and high accuracy waveform output, 250MHz frequency counter, as well as digital modulations of AM, DSSC AM, FM, PM, ASK, FSK, BPSK. Built-in USB device, USB host and RS232 interface support easy remote control. 4.3-inch TFT LCD display, user-friendly interface design and keyboard layout brings excellent operation experience.
